PROFILE

Frontend developer at Leadway Assurance, building production insurance platforms with React, Next.js and TypeScript. Backend experience in NestJS and MongoDB. Monthly open-source contributor and freelance event microsite designer (Eventlybuilt). Open to remote roles.

EXPERIENCE

Frontend Developer

Leadway Assurance Company Limited | Abuja, Nigeria | Apr 2023 - Present (joined as Frontend Developer Intern)

- **Vendor Bidding Portal (Jun - Dec 2025):** vendor registration and the vendor module for a bidding platform, live today.
- **Intermediary Portal (Apr - Jun 2026):** 16 insurance products including the Deferred Annuity Plan (DAP), Leadway Lifetime Plan (LLT), Immediate Annuity (IA) and Education Savings Plan (ESP), with multi-step proposal wizards, conditional medical questionnaires, plan selection, signature and review steps.
- **Payments and PDFs:** Paystack payment flow for the Deferred Annuity Plan and downloadable PDFs with pdfmake.
- **Life Core Admin (May - Jul 2026):** admin portal for the life insurance business. Built user flows, quotation management, task management and role-based permissions, plus the animated sidebar, dashboard and a quotation chat widget.
- **Core General Business Admin (current):** admin application for the general insurance business. Building authentication (login, OTP, token refresh), user flows, quotations, tasks and permissions, among other modules.
- **Across portals:** live API integration, DTO mapping audits, auth gate and privilege-based UI access, English/French i18n, CI and Docker fixes.
- Reduced bug-related incidents by 30%.

Source code is proprietary and held in private repositories. Walkthroughs of architecture, flows and my contributions are available on request.

Founder and Designer-Developer

Eventlybuilt (freelance brand) | Jan - Apr 2026

- Wedding microsite with countdown, password-protected guest list and RSVP.
- Baby shower site and potluck coordinator app (No More Popcorn); brand content on Instagram, TikTok, X and LinkedIn.

BACKEND EXPERIENCE

- **MantaHQ:** NestJS, MongoDB, Mongoose.
- **E-commerce API:** personal project, on GitHub (not hosted).
- **StarkHive:** open source, on GitHub (not hosted).

OPEN SOURCE

Contributing every month, mostly in the Stellar/Soroban ecosystem.

- **StellArts:** Next.js theme migration, reviews feature, cache fix, Soroban escrow fee system.
- **Sentinel:** NestJS reputation scoring module and CI fixes.
- **Xconfess:** moderation queue with state-machine transitions and audit logging.
- **StellarSplit, TipTune, Stellar Quest, TitleChain:** maintainer (GrantFox and Drips Wave), including grant applications and 30 structured issues for contributors.

PERSONAL PROJECTS

Expense tracker with analytics, quiz platform with Firebase auth, and an SEO-optimised architecture site. Demos on request.
